The literature offers three competing explanations for the observed pattern. The first emphasises measurement error in administrative records, the second points to selective reporting by establishments, and the third argues that compositional change drives the entire result.

Table 2. Decomposition of the change

Component	Share	Change
Composition	42.1%	-0.06
Reporting	31.5%	-0.04
Measurement	26.4%	-0.03
